

Security is not just about one tool – It's about how they fit together.

Contact us for a demo

YubiKey Lifecycle Management

- PIN & PUK management for PIV/FIDO2 & PIN policies
- Inventory management, manual or automatic assignment
- Centralized enrollment management: self-enrollment & enrollment on behalf of users
- OTP & static password management
- Lost & Found, blocking of lost, outdated, or compromised YubiKeys
- Screen lock on YubiKey removal
- Flexible certificate management & self-service
- Import & instant availability (in stock)
- Proactive PKI certificate renewal before expiration
- One-click integration with MS Active Directory & Entra ID
- One-click certificate revocation & passkey removal

Awareness Management

- Flexible notifications for users
- Provable confirmation of acknowledgment and understanding
- Real-time dashboard overview
- Multilingual communication
- Transparent analytics and reporting
- Audit-proof records of confirmations and responses

Data Protection

- Facilitates the implementation of data protection policies on Windows 10 and 11, in accordance with the criteria set by the Federal Office for Information Security (BSI).

Encryption

- Secure data exchange on various storage types, e.g., cloud, network, external, and local storage
- Container encryption with different methods – password-based, post-quantum resistant, YubiKey-based (passwordless and certificate-based)
- Methods can be combined
- Support for multiple passwords and YubiKeys per encryption container

Password Manager

- Passwords, credit cards & credentials – securely stored
- MFA protection – also supported with post-quantum-resistant methods or YubiKeys
- Accessible on various devices/OS (Windows, Linux, macOS, iOS, Android)
- Centralized management
- Secure password sharing with team members
- Individual permissions per user/group – View/Edit/Manage
- Private & business mode

Zero Trust Application Access

- Easy implementation with predefined approval rules
- Analysis mode – runs without blocking applications
- Approval based on publisher, product, hash values, or custom rules
- No issues with program updates
- Analysis of blocked applications
- Additional security through YubiKey linking – enables multi-factor authentication for sensitive applications with insufficient authentication

Zero Trust Storage Access

- Access rules per user/group – Full access/Read access/No access
- Allow list of USB devices – Specific vendors, models, devices
- Centralized management
- Inventory & USB access journal
- Real-time dashboard – Usage analytics & transparency
- Temporary device access: access that automatically expires

Security Key Lifecycle Management

- Inventory tracking, manual or automatic assignment
- Lost & Found
- Certificate management
- Self-service
- Import & instant availability (in stock)

What makes us special?

Usability

- Self-explanatory, simple, and intuitive – almost no training required
- Quick implementation, minimal administrative effort
- No disruption to users' workflow

Security & Added value

- Combination of complementary components in a single solution
- Real added value and greater benefit through the interaction of the modules
- Quick ROI

Deployment

- Cloud/on-premise/hybrid solution
 - Available as a Managed Service
- * Your maximum security, implemented simply – that is our goal!
